## Corporate Culture

### Corporate Mission

Creating an Intelligent Society through  
Technological Innovation

### Corporate Vision

Becoming a trusted and respected first-class  
enterprise

### Core values

Value creation, creating value for customers;  
Integrity: honesty and trustworthiness, accumulated  
through practice;  
Team collaboration: sharing and sharing, equal  
cooperation;  
Excellence: Refusing mediocrity and striving for  
excellence;  
Embrace change: embrace change and innovate  
bravely;  
Professional dedication: professional dedication,  
breakthrough in oneself;

Established in 2014, Corebai Microelectronics (Beijing) Co., Ltd. has strictly adhered to the concept of "Creating value for the customers is what we're fighting for" and the business objective of "Seek Development, Provide Service and Make Innovations by virtue of Core Products". Based on the development through many years, the company obtained the new high-tech enterprise certificate in 2016 and Zhongguancun New High-tech Enterprise Certificate in 2017, and then joined the semi-conductor association. At present, the company has applied for over 40 layout patents, and a rapid growth has been realized in the self-developed products to be launched on the market by virtue of its sufficient capital and powerful technical strength. Nowadays, more than 300 products that can be divided into eleven categories have conformed to EU RoHS standards and corresponding green and environmental-protection standards. Main products developed include amplifiers, interface circuits, power managers and ADC/DAC etc..

The company's products are widely applied to various fields such as the hand-held mobile terminals, consumer electronics, personal computers and peripherals, network and telecommunications equipment, medical equipment, office equipment, automotive electronics and industrial control equipment etc..

As various products feature high reliability, low power consumption and adaptability to portable applications, the company has established the strategic partnership with many world-renowned wafer factories and packaging test factories to ensure the production capacity and the quality, and maximally maintain the customers' interests. With advanced production lines and strong production capacity support from third parties, we pursue continuous improvement of technology and control of production costs.

Corebai Microelectronics (Beijing) Co., Ltd. consists of Design Team, Sales Team and Market Development Team, employing 40 team members.

Design Team: main members have accumulated 8-years experience in the design of analog circuit and digital circuit, and are very skillful in the advanced integrated circuit design, process, production, testing technology and quality management.

Sales Team: the sales director has accumulated more than 10-years experience in developing the chip sales channels, and has an outstanding insight into the market anticipation and changes. Besides, it has established the sales network in Beijing, the Pearl River Delta, Hong Kong and Taiwan, and developed a good long-term cooperation relationship with various chip sales agents in different areas.

# COREVA

# DEVELOPMENT PROCESS

**2014**

2014 Corebai  
Microelectronics  
(Beijing) Co., Ltd.  
Established

**2015**

In 2015, a total of over 20 patents were applied for, including 10 invention patents, 10 utility model invention patents, and 3 layout patents.

**2016**

In 2016, the high-speed 14-bit DAC, 2.5 GSPS, and high-performance RF digital-to-analog converter were successfully taped, which was recognized by a large number of customers and widely used in product application solutions.

**2017**

In 2017, the sales performance broke through a new historical high and the products were recognized by a large number of users.

**2018**

In 2018, R&D and design department was established in Tianjin, setting a new direction for product development.

**2021**

2021 Corebai  
Microelectronics  
(Shenzhen) Co.,  
Ltd. was officially  
established.

**2019**

In 2019, we signed the first batch of 10 chip sales agents to comprehensively promote the market of our products.

**2020**

In 2020, the IC design and development team expanded again, and the company's headquarters settled in the Beijing Integrated Circuit Design Industrial Park IC-PARK.

**2022**

2022 voltage reference, analog switch, and multiplexer chip synchronous start design and development work.

**2024**

High speed and high precision ADC CBM96AD53. Committed to the design and development of higher speed and precision ADC and DAC.

**2023**

We launched high-speed ADC CBM16AD125 products to continuously accumulate experience and resources for technology improvement and market expansion, and gradually enhance product influence.

# PRODUCTS

High Speed A/D Converters: CBM16AD125  
High Speed A/D Converters: CBM94AD67  
High Speed A/D Converters: CBM96AD53

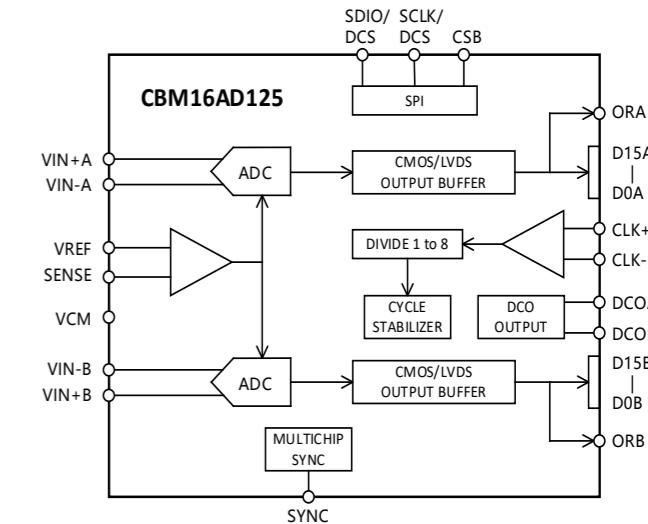

High-speed ADCs	Precision OpAmps
Precision ADCs	General-purpose OpAmps
High-speed DACs	Low-noise OpAmps
Precision DACs	Low-Power OpAmps
Direct Digital Frequency Synthesizer(DDS)	High-voltage-general-purpose OpAmps
Quadrature Digital Up-converter(QDUC)	Digital isolator
USB Controller	Comparators
Ethernet MAC Controller	Interface RS-485 & RS-422
Voltage reference	Interface RS-232
CAN transceiver	Low-cost Microprocessor Monitoring Circuits
Analog Switches & Multiplexers	Power Management
Logical gate	Clock
High-speed OpAmps	Darlington transistor

## High Speed A/D Converters: CBM16AD125

16-Bit, 125 MSPS/105 MSPS/80 MSPS, 1.8 V Dual Analog-to-Digital Converter

## FEATURES:

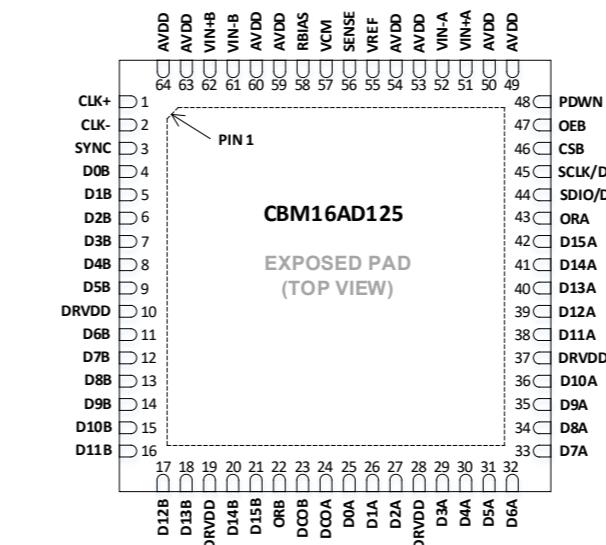

- SNR = 78 dBFS @ 70 MHz and 125 MSPS
  - SFDR = 88 dBc @ 70 MHz and 125 MSPS
  - Low power: 800 mW @ 125 MSPS
  - 1.8 V analog supply operation
  - 1.8 V CMOS or LVDS output supply
  - Integer 1-to-8 input clock divider
  - IF sampling frequencies to 300 MHz
    - 153.6 dBm/Hz small-signal input noise with 200  $\Omega$  input impedance @ 70 MHz and 125 MSPS
  - Optional on-chip dither
  - Programmable internal ADC voltage reference

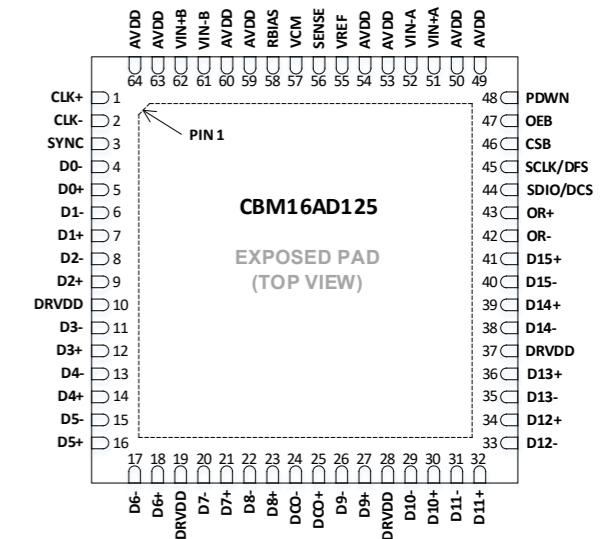

## Functional block diagram

## QFN Interleaved Parallel LVDS Pin Configuration (Top View)

## High Speed A/D Converters: CBM94AD67

16-Bit, 200 MSPS/250 MSPS Analog-to-Digital Converter

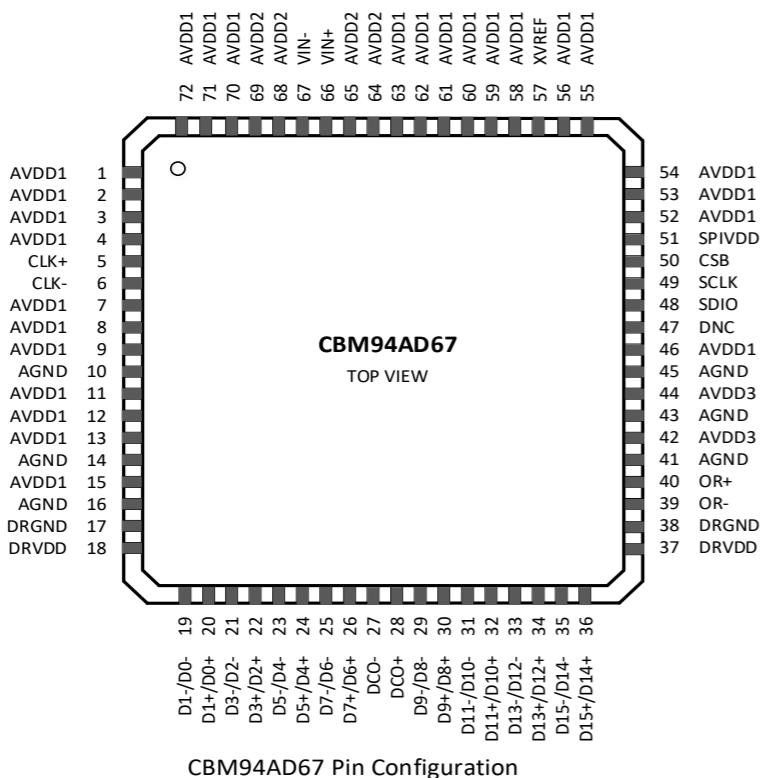

### FEATURES:

- SNR: 75dBFS(170 MHz @ 250 MSPS)
- SFDR: 85dBc(170 MHz @ 250 MSPS)
- 60 fs rms jitter
- Excellent linearity at 250 MSPS
- DNL =  $\pm 0.5$  LSB typical
- INL =  $\pm 3.5$  LSB typical

Functional block diagram

### PIN CONFIGURATIONS

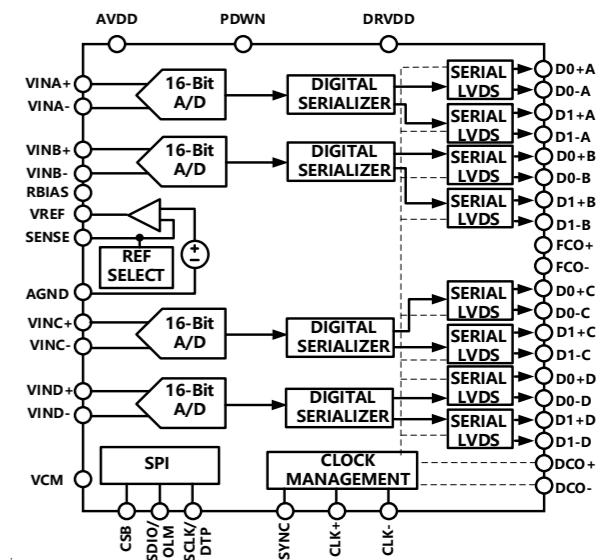

QFN-56 Pin Configuration, Top View

## High Speed A/D Converters: CBM96AD53

Quad, 16-Bit, 125 MSPS Serial LVDS 1.8 V Analog-to-Digital Converter

### FEATURES:

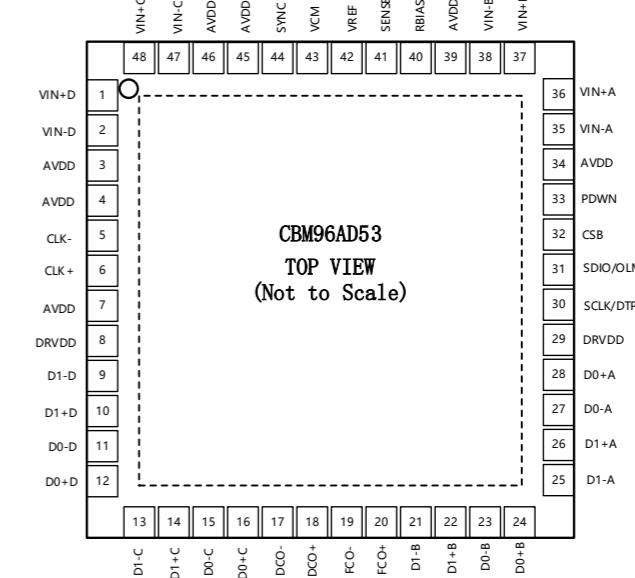

- 1.8 V supply operation
- Low power: 173 mW per channel at 125 MSPS with scalable power options
- SNR = 76.5 dBFS @ 70 MHz (2.0Vp-p input span)
- SNR = 77.5 dBFS @ 70 MHz (2.6Vp-p Input span)
- SFDR = 90 dBc (to Nyquist)
- DNL =  $\pm 0.7$  LSB (typical); INL =  $\pm 3.5$  LSB (typical)
- Serial LVDS (ANSI-644, default) and low power, reduced signal option (similar to IEEE 1596.3)
- 650 MHz full power analog bandwidth
- 2V p-p input voltage range (supports up to 2.6 V p-p)
- Serial port control

Functional block diagram

Note: Pin names are for the CMOS pin configuration only
